

Washington Intensifies Attacks against Bolivia

La Paz, February 5 (RHC)-- Bolivia's Cabinet Chief Juan Ramon Quintana has criticized the United States for interfering in the internal affairs of the Andean country.

In an exclusive interview granted to TV network teleSUR on Thursday, Quintana accused Washington of providing financial and organizational support to the Bolivian opposition.

The government official criticized the U.S. State Department and national opposition for their constant attacks on Evo Morales' administration.

"Former Bolivian leaders have been carrying out destabilization plans and smear campaigns against Morales since he was elected in 2006," Quintana said.
