

Argentina's Opposition Slams Attacks Against Offices

Buenos Aires, March 7 (RHC)-- The progressive coalition "Front for Victory" has demanded Argentina's authorities properly investigate the two attacks carried out against the offices of two of their parties, resulting in two people injured.

Opposition lawmakers from the Front for Victory criticized "the (recently-elected) political leaders who talked about unifying and bringing peace to Argentinians," arguing that instead they "have fomented an atmosphere of revenge since they took office in December, encouraging similar actions."
