

Cuba Prioritizes Eco-friendly Investments

Havana, June 23 (RHC)-- Participants in the 2nd Cuban Industrial Convention and Fair, Cubaindustria 2016, have learned about the environmentally-friendly investments promoted by Cuba in such areas as refrigeration, using natural gas and other renewable energy sources.

Cuban expert José Ramón Rojo said that the aim is to reduce considerably Cuba's already low emissions of polluting substances that cause the greenhouse effect into the atmosphere, and in accordance with commitments made at the latest UN climate summit in Paris.
