

Cuban Group Labiofam Develops Investment Plan to Strengthen Agricultural Sector

Havana, February 7 (RHC)-- Cuba's Labiofam Group is developing a huge investment plan aimed at meeting the growing demands in the local agricultural sector, particularly livestock farming.

Labiofam President Dr. Alfred Crespo said a multi-million dollar line of credit will be used to produce animal vaccines and medication, biopesticides, as well as food supplements for human consumption.

Dr. Crespo noted that Labiofam produces 98% of vaccines and medication used in the local livestock sector.
