

Cuba and Costa Rica Exchange on Bio-energy

Havana, August 1 (RHC)-- Specialists with the Costa Rica's Electric Power Research Institute and Cuba's Ministries of Higher Education and Industries are sharing their experiences and expertise on renewable energy sources, particularly bio-energy.

José Antonio Aragón, Director for Studies and Projects with the Costa Rican Institute recalled his recent visit to Havana, where he participated in an international forum on renewable energy. He praised Cuba's advances in the field.
