

Cristina Fernandez Undergoes Satisfactory Brain and Cardiac Controls

Buenos Aires, February 14 (RHC) — Argentinian President Cristina Fernández went on Thursday evening to the Favaloro Foundation Hospital in Buenos Aires for a medical check-up, including a brain scan and an electrocardiogram which were described as “satisfactory.”

“Complying with the plan by the Presidential Medical Unit (UMP) for the control of President Cristina Fernandez health condition, she underwent medical tests consisting of a neuro-image and an electrocardiogram,” says the release signed by doctors Luis Buonomo and Marcelo Ballesteiros from the UMP.

The Argentinian leader has been under close medical observation after undergoing surgery to drain a blood clot.
