

Ecuadorian President Rafael Correa Warns About Dirty Opposition Campaign

Quito, February 17 (RHC)-- Ecuadorean President Rafael Correa warned that the right-wing has implemented a dirty campaign to create a violent situation.

He talked about false e-mails and phone calls about the alleged debt to the tax administration and the strategy of the opposition to deny the development of Quito under the administration of *Alianza Pais*.

He highlighted the different works that have been implemented, like the metro and building a new highway to the international airport and urged the people from Quito to challenge those who offend their country.

Correa, who has been supporting the candidates of *Alianza Pais* in the electoral campaign, warned that the victory of the opposition would endanger all the achievements of his administration which has been power for seven years ago.
