

At Least 3 Killed in Yemen by U.S. Drone Strike

Sanaa, March 5 (RHC)-- A U.S. drone strike has reportedly killed at least three people in Yemen's Marib province near the town of Shebwan. Tribal sources said a drone hit the vehicle of a suspected al-Qaeda fighter, killing him and two other occupants. Two civilians tending sheep nearby were reportedly wounded.

Reuters reported there was a second drone strike in Yemen, saying at least four people had been killed in the two strikes. Last week, the European Parliament voted overwhelmingly to condemn the drone strikes by a vote of 534 to 49, passing a resolution that calls for member states to ban extrajudicial killings.
