

Donald Trump denies findings of National Climate Report

Washington, November 28 (RHC)-- U.S. President Donald Trump has said he does not believe the findings in last week's government report on climate change.

Thirteen federal agencies contributed to the report, which warns that human-driven climate change threatens to shrink the U.S. economy by as much as ten percent by 2100, while increasing extreme weather events, destroying infrastructure, worsening air quality, destroying crops and leading to more frequent disease outbreaks.
