

Saudi air raids kill at least 10 in northern Yemen

Sanaa, July 30 (RHC)-- In Yemen, air raids on a market killed at least 10 people, including children, in the northern Saada province Monday, according to local reports.

The attacks were carried out by U.S.-backed, Saudi-led forces.

The United Nations' "Children in Armed Conflict" report found that the Saudi-led coalition was responsible for the killing or wounding of 729 Yemeni children in 2018.
