

U.S. health expert says Americans are following a recipe for disaster

Washington, June 30 (RHC)-- In an interview with CNN, U.S. top infectious disease expert Anthony Fauci admonished Americans failing to comply with security measures calling it a "recipe for disaster."

"There are crowds. They are not physical distancing, and they're not wearing masks. That's a recipe for disaster," said Fauci.

"Now we're seeing the consequences of community spread, which is even more difficult to contain than spread in a well-known physical location like a prison or nursing home or meatpacking place."

The U.S. reported more than 2.5 million cases and more than 125,000 related deaths, the highest toll in the world.
