

Che the photographer, an exhibition opened in Sancti-Spiritus

Sancti-Spiritus, January 18 (RHC)-- The traveling exhibition Che the photographer was inaugurated at the Oscar Fernández-Morera art gallery in central Sancti Spiritus city.

The exhibition is part of activities on a new anniversary of Sancti Spiritus by Spanish colonialists in 1514.

The exhibition comprises snapshots taken by none other than legendary Cuban-Argentinian guerrilla fighter Ernesto Guevara de la Serna (CHE) at different moments of his life.

Exhibition goers can appreciate Che in his travels worldwide, and others he took in Cuba after 1959.

Sancti Spíritus is the third Cuban province visited by the traveling exhibition, after Villa Clara and Cienfuegos in that order.

Jorge Luis López, president of the Provincial Council on Fine Arts, said the exhibition is sponsored by the National Council of Fine Arts and the Ministry of Culture. He added that the exhibition has been, for years, traveling the world, mainly across Latin America.
