**Israeli air and ground army are involved in attacks against civilians in the Gaza Strip??**

Gaza City, May 15 (RHC)-- The Israeli regime has intensified its attacks on the Gaza Strip. The Israeli air and ground army are involved in attacks against civilians in the Gaza Strip, with residents of northern parts of Gaza forced to leave their homes due to Israeli strikes.

Hundreds have been killed in The Gaza, including women and children while several deaths have been reported in Israel since Monday when the two sides started exchanging fire. Such an escalation is described as the worst since 2014. It was triggered by weeks of Israeli crackdown on Palestinians in East Jerusalem al-Quds.

Israel has waged three wars against the Gaza Strip so far, killing thousands of Palestinians in each. The latest escalation has raised fears of another warfare. Resistance groups have vowed to press ahead with their retaliatory attacks as long as the Israeli regime continues its acts of aggression.
