Havana, November 1 (RHC)—Cuban health authorities reported on Monday 633 new COVID-19 infections and four fatalities associated with the disease over the last 24 hours.

According to the Public Ministry website, as of midnight, there were 3674 positive cases hospitalized.

The Caribbean island now accumulates 952 634 diagnosed cases. And 8,240 deaths since March 2020.

The provinces of Holguin and Camaguey reported the highest number of cases with 107 and 104, respectively.

As of October 30, 7.2 million Cubans were fully vaccinated against the disease with Soberana02, Soberana Plus, and Abdala vaccines.
