Havana, December 18 (RHC)-- The Cuban Ministry of Public Health (MINSAP) reported Friday that at the close of December 15, 29,126,523 doses of the Cuban vaccines 'Soberana-02', 'Soberana Plus' and 'Abdala' had been administered in the country.

Today, 10,235,340 people have received at least one dose of one of the Cuban vaccines 'Soberana-02', 'Soberana Plus' and 'Abdala' (including those vaccinated with 'Soberana Plus' as a single dose). Of these, 9,275,241 persons have received the second dose, and 8,870,275 persons have received the third dose.

9,402,992 people are fully vaccinated, 84.1% of the Cuban population.

A total of 745,667 people have booster doses, 71,353 of them as part of the clinical study and 659,395 as part of the booster vaccination applied to the population of selected territories and risk groups.
