Havana, January 28 (RHC)-- The Cuban Ministry of Public Health (Minsap) reports that nine million 815 thousand 389 people completed the anti-COVID-19 vaccination schedule, which represents 87.7 percent (%) of the country's population.

As of January 26, 10 million 561,720 people had received at least one dose of the Cuban immunogens Soberana 02, Soberana Plus, or Abdala, of whom 9 million 342,453 have received a second dose and 9 million 009,649 a third.

Five million 054,186 people have booster doses: 383,598 as part of clinical studies and 4,670,588 in the booster vaccination that is being applied to the population of selected territories and risk groups.

In total, 33 million 968 thousand doses of Cuban vaccines against COVID-19 have been applied.
