Managua, January 10 (RHC)-- The president of Nicaragua, Daniel Ortega, has warned about the reinstallation of fascism in different parts of the world.

During a solemn act of installation of the 2023 legislative period of the National Assembly of Nicaragua, the president spoke about the assault of Bolsonarista groups on the headquarters of the Public Powers in Brazil.

"This has to do with the way in which fascism is reinstalling itself in the world; reinstalling itself first in the United States, in Europe, where openly fascist parties appear making their campaigns and also reaching power, and we see it now in Brazil and Bolivia," he said. He also urged to be vigilant because "terrorists

are always conspiring."

President Ortega recalled that former Brazilian president Jair Bolsonaro "is a fascist" and that he did not hide it, as well as his racism. "He went to Florida because he knows that there is the hotbed of all those who live conspiring against the peoples who fight for their self-determination, for their independence," said the president.

"Just as we defend peace, we must firmly defend justice and the application of justice against criminals," he said.
