Havana, Jan 28 (RHC) The Cuban Institute of Friendship with the Peoples and the Cuban-Arab Friendship Association joined Saturday in the international rejection of Israel's Zionist violence which has caused new deaths among the Palestinian people.

A statement issued in Havana by both organizations condemns those actions that attempt to "defeat the admirable resistance of the heroic Palestinian people".

It details that "the recent assassinations of nine Palestinians in the occupied West Bank, including an elderly woman, proves, beyond any doubt, the criminal and inhuman nature of the Zionist aggression and at the same time reinforces the fairness of the cause defended by the Palestinian people".

It adds that the extreme and unpunished violence against unarmed Palestinians, which has resulted in dozens of deaths this year, calls for the unanimous and resolute rejection of the international community.

It also states that "It is time for a united march, let us demand the right to return, the freedom of political prisoners, and the recognition of East Jerusalem as the capital of the Palestinian State".

Both organizations emphasize that they will continue "to raise our voices in all scenarios because this abuse committed against an entire people must stop! (Source: Prensa Latina).
