

Israeli Airstrikes Level Buildings in Gaza

Gaza City, August 25 (RHC)-- Israel has leveled a 12-story apartment building and a seven-story office building as it continues its bombardment of Gaza. According to Agence France-Presse, more than 100 Palestinians have been killed since Israel resumed airstrikes last week.

On Saturday and Sunday, Palestinian medics said at least 22 people were killed, including a one-year-old girl and a mother and three children from the same family. Several Palestinians have been killed today, including a three-year-old boy.

Nearly 500 Palestinian children have been killed since Tel Aviv began its assault in early July. In the occupied West Bank, a 14-year-old boy who was shot Friday during a protest against the Gaza assault has died from his wounds.
