

# *More than 920 Israeli attacks on Palestinians reported in September*

---

Ramallah, October 6 (RHC)-- The Israeli Apartheid Wall and Settlement Resistance Commission denounced that last September the Zionist regime perpetrated 923 aggressions against Palestinians in the West Bank.

The report includes attacks against Palestinian civilians, bulldozing of land, cutting down trees and confiscation of property. The text underlined that the area in which most aggressions were reported was Jerusalem with 181, followed by Nablus with 144 and Hebron with 101.

According to the report, Israeli settlers carried out 123 attacks against Palestinians, of those 40 in Nablus and 22 in Hebron.

As part of the Zionist regime's expansionist and anti-Palestinian policy, it plans to build more than 1600 new settler homes on 35 hectares in Ramallah and Jerusalem. In September alone, Israelis demolished 28 Palestinian homes and facilities.
