

Reporters Without Borders says Israel targeted journalists in attack that killed Issam Abdallah

Image not found or type unknown

Ramallah, October 31 (RHC)-- At least 31 journalists have been killed since October 7 across the region: 26 Palestinian, four Israeli and one Lebanese.

Among the casualties is Reuters visual journalist Issam Abdallah, who was killed in southern Lebanon on October 13th. A preliminary investigation by Reporters Without Borders found Abdallah, and the group of journalists he was with, were “targeted” by Israeli forces.

RSF says: “Two strikes in the same place in such a short space of time (just over 30 seconds), from the same direction, clearly indicate precise targeting.”
