Argentinian solidarity movement reiterates support for Cuba

Havana, January 19 (RHC) The Argentinian Movement of Solidarity with Cuba (MasCuba) reiterated this Friday its support for the people and government of the Caribbean nation, and denounced the continued aggressions of the United States.

In a document approved during its first meeting this year, MasCuba welcomed the 65th anniversary of the triumph of the Revolution, and asserted that Washington's actions to try to annihilate it are criminal.

“For this reason, in the United Nations Organization, the vast majority of countries demand the lifting of the economic, commercial and financial blockade and the removal of Cuba from an arbitrary list of alleged sponsors of terrorism,” the text indicates.

It assures that the Movement will continue to actively provide its solidarity to the largest island of the Antilles as it has done so far. (Source: PL)
