

Video Shows Israel Hosts Takfiri Terrorists in Occupied Golan Heights

Tehran, September 24 (RHC)-- Exclusive footage by Press TV shows the Takfiri terrorists in the Israeli-occupied Golan Heights in Syria. In the video provided by the Press TV correspondent in the region, black-clad masked terrorists are seen holding weapons as several vehicles pass by.

The footage is not the first indication that Tel Aviv is working together with the foreign-backed militant and terrorist groups inside Syria. In August, Syria's ambassador to the UN Bashar Ja'afari told Press TV that the Israeli regime allows the free flow of weapons and ISIL Takfiri militants into the occupied Golan Heights and then into the rest of Syria.

The Israelis help the Takfiris infiltrate into the separation line on the Golan Heights from Jordan, where their training camps are located, the Syrian diplomat said.

Regarding the video, Press TV News Director Hamid Reza Emadi said people in the Middle East "are wondering why the Takfiri terrorists only kill Muslims and Christians in Iraq and Syria, but do not act

against Israel's interests." He said that "the video could answer this question since it shows how Tel Aviv welcomes the Takfiris."

In February, Israeli Prime Minister Benjamin Netanyahu paid a visit to a secret field hospital in the occupied Golan Heights, where injured militants coming in from Syria receive medical treatment. Earlier this year, Israeli Channel 2 News aired footage of the secret Israeli field hospital that had reportedly treated over 700 Syrians, including militants, over the past months.

Syrian government troops have repeatedly seized large quantities of Israeli-made weapons and advanced military equipment from the foreign-backed militants in Syria. Takfiri terrorists of the ISIL control large swathes of territory in Syria and Iraq, where they have committed heinous crimes against government

forces and civilians.
