, Ramallah, April 20 (RHC)-- Palestinian emergency services have uncovered a mass grave with 50 bodies at the Nasser Medical Complex in Khan Younis.

The service said: "Our teams continue their search and retrieval operations for the remaining martyrs in the coming days as there are still a significant number of them."

The discovery comes after the Israeli military withdrew its troops from the southern city on April 7. Much of the city is now in ruins after months of relentless Israeli bombardment and heavy fighting.
