San Francisco, May 30 (RHC)-- Daily protests against Israel's war continue. In the Northern California city of San Ramon, dozens of activists blocked the entrance to Chevron's corporate offices as the company held its annual shareholder meeting.

Chevron says it supplies Israel with the bulk of its electric energy, and owns deepwater gas fields off the coast of occupied Palestinian land, from which Israel has raked in billions in profits in recent years.

Wassim Hage of the Arab Resource and Organizing Center spoke with reporters: "Chevron is a major stakeholder in the unfolding violence we are seeing in Palestine, massive shareholder and massive profits to be promised from the plunder of Gaza. And we are here to demand an end to the complicity of this corporation in that genocide."
