Cienfuegos, June 7 (RHC)-- The first edition of the International meeting Justicia 2024 Artificial Intelligence and the Legal World: Challenges and Opportunities met for two days at the Carlos Rafael Rodríguez University of Cienfuegos, with the audience in real time via the Internet.

They socialized research from the legal world and artificial intelligence, virtually allowing the holding of seminars, talks and conferences presented by experts, who shared information on a specific topic for legal professionals, fundamentally.

Among the participating countries, Russia, Mexico, Spain, Jamaica, Italy, Chile, Colombia and Cuba stood out, all coordinated by Mailin Ramos Morales, President of the Computer Law Chapter in Cienfuegos, of the National Union of Jurists of Cuba and Professor of the Course of Law at the University of Cienfuegos.

More than 250 people participated and according to Ramos Morales, this international space allowed sharing with the Law Network of Latin America and the Caribbean.

Also with the National Organization of Collective Law Firms, he added, the National Union of Jurists, the Electronic Government Center and the Cuban Society of Law and Informatics, with the main co-sponsorship of the Carlos Rafael Rodríguez University.
