New York, July 26 (RHC)-- The United States has reportedly armed the Israeli regime with upwards of 25,000 bombs and missiles since October 7, 2023, which marked the onset of Tel Aviv's yet-ongoing genocidal war against the Gaza Strip.

The New York Times provided the figure on Thursday, citing the Jewish Institute for National Security of America, a think tank. According to the report, the American arms shipments to the occupied Palestinian territories throughout the war had featured over 20,000 unguided bombs, some 2,600 guided bombs, and 3,000 surgical strike missiles.

Two US officials say Washington has sent Israel large quantities of ammunition, including thousands of highly destructive 2,000-pound bombs, since the start of the regime's brutal war on Gaza in October last year.

The regime launched the war following al-Aqsa Storm, a retaliatory operation staged by Gaza's resistance groups against the occupied territories. Ever since, it has been deploying the U.S.-supplied projectiles against numerous civilian targets.

Earlier this month, the regime's military radio reported that the Israeli Air Force had dropped a total eight US-manufactured JDAM (Joint Direct Attack Munition) bombs against the al-Mawasi refugee camp in the southern Gaza city of Khan Younis, killing and injuring a total of 390 Palestinians. In all, the war has so far claimed the lives of more than 39,175 Palestinians, mostly women and children, and wounded 90,257 others.

Last month, The Washington Post reported that the US had supplied the regime with over \$6.5 billion in military supplies since the beginning of the brutal military onslaught. The sheer increase comes while Washington's annual so-called military aid for Tel Aviv stands at around \$3.3 billion.

Washington has also used its veto power on several occasions so far to prevent the UN Security Council from issuing a resolution that would call for implementation of an immediate ceasefire in the war.

The untrammelled American political and military support for the regime comes despite an order issued by the International Court of Justice, the United Nations top court, on the regime back in January to take all measures within its power to prevent genocide in Gaza.
