Gaza City, September 11 (RHC)-- A probe by independent investigators has found that Israel likely used U.S.-made MK 84 bombs in the attack on the tent encampment at al-Mawasi, killing more than 40 innocent civilians, mostly women and children.

Gaza officials said the 2,000 pound weapon "melted" the bodies of the victims who were in the eye of the attack.

Condemnations have poured in from world leaders after Israel bombed the so-called "safe-zone" in southern Gaza, killing more than 40 people and wounding at least 60 others. The toll is expected to rise.
