

Israel's military says preparing to use what it calls great force in central Gaza

Image not found or type unknown

Tel Aviv, October 5 (RHC)-- The Israeli military has posted yet another evacuation order on social media platform X, warning Palestinians that the military forces were preparing to use "great force" in central Gaza. The order was posted Saturday with an attached map, calling on residents living in areas near the

Netzarim Corridor in central Gaza to evacuate. The Netzarim Corridor is a zone of occupation that the Israeli regime has set up in the Gaza Strip during its genocidal war in Gaza.

It said that Hamas and the resistance fighters continue their "activities within your area and, as a result, the (military) will act with great force against these elements." Palestinians living in areas near the Netzarim Corridor in central Gaza have been warned to evacuate under the latest order posted on X.

The latest order is the first in weeks for Gaza as the regime has largely deployed forces to Lebanon. Rights groups say Israel's evacuation calls are "in fact forced displacement orders that constitute a crime against humanity according to the Rome Statute."

According to the UN agency for Palestinian refugees, more than 80 percent of the Gaza population has been forcibly displaced due to the Israeli offensive across the besieged territory.

It says Tel Aviv's mass displacement campaign has affected about two million people in the narrow populated coastal territory, most of whom were forcibly displaced multiple times.
