

Hospital in Gaza warns children will die if Israel forces them to evacuate

Image not found or type unknown

Gaza City, October 12 (RHC)-- The situation at three hospitals in northern Gaza remains extremely critical as medical workers struggle to respond to forced expulsions ordered by Israel.

Dr. Hussam Abu Safiya, director of Kamal Adwan Hospital, filmed a video testimony from inside the intensive care unit. “We are here under threat, because our hospital will go out of service due to the continuous threats to evacuate the hospital and due to the lack of entry of fuel to the Kamal Adwan Hospital. From here, from the middle of the intensive care unit, I call on all the international organizations and humanitarian organizations and the international community to stop the occupiers from implementing their decision to evacuate the Kamal Adwan Hospital and ceasing its services. Stopping the Kamal Adwan Hospital from providing services means the ending of these children’s lives.”
