Beirut, November 6 (RHC)-- Hezbollah has announced that it launched rockets at an explosives factory located south of Haifa as part of its retaliatory operations against the Israeli regime.

The Lebanese Resistance movement also reported attacks on the Miron base, which manages aerial operations, and the Ma'aleh Golani base, the command center for the Hermon Brigade 810, utilizing rocket barrages.

In addition, Hezbollah targeted Israeli army artillery systems in the settlement of Neot Mordechai with a squadron of attack drones, successfully hitting their intended targets.

Furthermore, the movement stated that it fired rocket barrages at concentrations of Israeli forces on the outskirts of the Lebanese town of Maroun al-Ras, as well as at various locations including Kiryat Shmona, Nahariyya, the Dovif military base, the Ramtha site, Yiftah settlement, and Margaliot settlement.

Hezbollah also indicated that it launched rockets at several Israeli settlements that had previously been subject to its evacuation orders.

According to Lebanese media reports, hundreds of Israeli troops have been killed since the regime launched its audacious "ground invasion" of southern Lebanon in early October.

The rising death toll of the invading forces has also been acknowledged by the Israeli media. Meanwhile, according to Lebanon's Ministry of Public Health, at least 2,986 people have been killed in Israeli attacks on the Arab country since October 2023, including 18 dead and 83 injured in the past 24 hours.
