Gaza City, December 6 (RHC)-- More people in the vicinity of the Kamal Adwan Hospital – targeted by the ongoing, repeated attacks by the quadcopters – have been killed and others have been critically

injured inside the hospital.

Dr Hussam Abu Safia, the director of Kamal Adwan, described the horrific conditions inside the hospital and the gruesome injuries they have been receiving inside the hospital that were caused by the attacks of the quadcopters in the past hours.

The hospital is running out of any meaningful medical care at this point, given the hardship and the fact the past 60-plus days have been very strict in terms of what can enter the northern part of Gaza as there is a complete siege, military siege, on the area with no humanitarian aid – medical supplies, water, or life-sustaining resources – available to people there because of the ongoing deliberate prevention by the Israeli military.

Conditions and the situation remain very difficult and continue to evolve by the hours into much more difficult and challenging scenarios, highlighting the vulnerability of civilians who are now without any proper protection. Even marked evacuation zones are becoming death traps for people.
