Tel Aviv, December 26 (RHC)-- Yemen's army says it has conducted another drone operation targeting the "industrial zone of the Israeli enemy" in the occupied Asqalan area.

Army spokesman Brigadier General Yahya Saree made the announcement on Wednesday. The operation, he said, “achieved its goal successfully.”

According to Saree, the two-stage operation by the Yemeni Air Force included a strike on a vital Israeli position in the occupied Yaffa area as well. In the other stage of the operation, the industrial zone was hit.

Yemen’s courageous operations against Israel and in support of the Palestinians are an eyesore to the adversaries of the Axis of Resistance.

Such operations have intensified in the recent past.

On Tuesday, a Yemeni missile struck a military site in Tel Aviv's southern suburb of Jaffa. Asqalan saw another Yemeni drone strike on Monday. And on Saturday, a missile strike near Tel Aviv injured 20 settlers.

Yemen’s army has made it clear that these operations are not going to stop unless the regime stops its vicious campaign of genocide in the besieged Gaza Strip.

Israel has killed more than 45,300 Palestinians in Gaza since October 2023. Yemenis have been actively supporting the cause of Palestine from the early days of the war.
