Palestinians walk amid the rubble of homes, destroyed by the Israeli army's air and ground

Geneva, March 13 (RHC)-- Israel has killed 150 Palestinians in Gaza using drones, snipers, or starvation as a weapon since the January 19th ceasefire agreement with the resistance movement Hamas, says a report.

The Euro-Mediterranean Human Rights Monitor said in its recent report that Israel killed 150 Palestinians at an average rate of three individuals every 24 hours within the mentioned period. Since the beginning of the ceasefire agreement, Israel has also injured 605 Palestinians in Gaza, at a rate of 11.8 individuals per day, the monitor said.

The Israeli regime has particularly targeted the Palestinians whose homes are near the “buffer zone” it has established along Gaza’s northern and eastern borders, the monitor said.

The genocidal policies of the regime have generated perilous living conditions that have led to the gradual and slow death of the Palestinians, it said.

The comprehensive illegal siege has strangled the Gaza Strip, the monitor stated, and has prevented the entry of essential humanitarian aid and services necessary for the survival of residents.

“This pattern underscores Israel’s systematic and ongoing targeting of Palestinians in the Strip, carried out with no ... justification and in blatant disregard of the ceasefire and international law.”

The rights monitor has warned of the deterioration of the humanitarian crisis if the Israeli regime’s siege persists. “All relevant countries and entities must fulfill their legal responsibilities and take immediate action to halt the genocide in the Gaza Strip,” the monitor said.

It also asked the International Criminal Court (ICC) to issue arrest warrants against Israeli officials implicated in the crimes in the Gaza Strip.

The ICC has already issued arrest warrants for Benjamin Netanyahu and his former minister for military affairs, Yoav Gallant, for war crimes and crimes against humanity.
