

Argentinian President Christina Fernandez Discharged from Hospital

Buenos Aires, November 10 (RHC-EFE) -- Argentinian President Cristina Fernandez was released Sunday from the Buenos Aires hospital where she was treated for sigmoiditis for a week and will have to spend 10 days resting, the Presidential Medical Unit said.

The president was released from the hospital because of the "good evolution of the case of sigmoiditis affecting her," Dr. Marcelo Ballesteros and Dr. Daniel Fernandez said in a statement issued by the Office of the President.
