

Cuba Hosts International Scientific Congress

Havana, June 23 (RHC-PL) -With the trade fair "Biopharmaceutical Products: Challenges of the Third Millennium", the International Congress of the National Center for Scientific Research (CNIC 2015) has opened its doors in Havana.

The exhibition promotes biopharmaceutical products and technologies from Cuba and the world, with the participation of trade firms, and national and foreign exhibitors.

The development in Cuba of vaccines against infectious diseases will be one of the main issues at the international forum, that runs until June 26th at Havana's Conventions Palace.
