

Inter-American Commission to Present Report on Ayotzinapa Teachers

Mexico City, September 5 (RHC-PL), -- Vidulfo Rosales, legal representative of the parents of the 43 school teachers who disappeared in Mexico, said the report to be presented next Sunday provides new guidelines for the investigation, media outlets reported.

An Interdisciplinary Group of Independent Experts from the Inter-American Commission on Human Rights will present the report "Ayotzinapa: Investigations and first conclusions", which summarizes the work developed during six months in the country.

This expert report will mark a new guideline in this investigation, it will shed some new light and provide new lines of investigations, said Rosales.

Parents expect that three new fundamental lines of investigation will be followed: one pointing to the Army, another to Guerrero State's former governor Ángel Aguirre and another to the political circle in Iguala and nearby areas.

According to the official version, the 43 teachers were attacked by municipal police and then delivered to

members of the cartel Guerreros Unidos, who killed them and incinerated their bodies, a version that relatives do not believe.
